Storage and Disposition of Weapons-usable Fissile Materials: MOX.

We are disturbed about proposals to use Plutonium in Nuclear Power Plants. Do we need any more opportunities for terrorists to acquire fissionable materials. 1/08.03.01

Plus new plants to process MOX are possibly in the billion dollar class; used nuclear waste products worrisome.

We urge you to stop this outrageous proposal.

Sincerely yours,
Dawn Campbell

08 03 01 **Comment Number 1**

The Department of Energy acknowledges the commentor's opposition to the Reactor Alternatives. However, NEPA requires that DOE look at all reasonable alternatives and, therefore, reactor burning must be considered. Decisions on the disposition of weapons-usable fissile materials will be based upon environmental analyses, technical and economic studies, national policy considerations, and public input.
