I wish to vigorously protest the transport of plutonium, under the euphemism MOX fuel from Hanford cross country and through Port Huron, Mich. to burn CANDU in Ontario Ca.

As you so well know plutonium is the world's most potent, hazardous material on the world.

Please do not support Americans, Canadians, and the co-operation to such a dangerous, almost immortal hazard.

08 03 01 **Comment Number 1**

The Department of Energy acknowledges the commentor's opposition to the use of the CANDU Reactor Alternative for the disposition of Pu. Decisions on disposition of weapons-usable fissile materials will be based upon environmental analyses, technical and economic studies, national policy considerations, and public input. This will include an appropriate level of analysis by Canada before any decision on burning Pu in a CANDU reactor is implemented.
