United States Department of Energy

NAME: (Optional)
ADDRESS:
TELEPHONE: ( ) DISPOSITION PEIS

The DOE has already decided against a plutonium-burning production and power reactor. There is continued pressure against oil production, coal mining from environmentalists.

Please, DO NOT, throw away huge amounts of energy without harnessing those MegaWatts we do not need to give it to CANADA, NOR commercial entities. Let the government build a new reactor, burn the Pu, and supply the power to the nation. BE A DEPARTMENT OF ENERGY! 1/08.03.01

The Immobilization and Borehole options merely put-off 'til tomorrow the ultimate disposition. Imagine the costs when a borehole starts a plume! 2/08.03.01

SR-003

08 03 01 Comment Number 1

The Department of Energy acknowledges the commentor's support for Pu disposition in reactors. Decisions on disposition will be made based upon environmental analyses, technical and economic studies, national policy considerations, and public input.

08 03 01 Comment Number 2

The Department of Energy acknowledges the commentor's opposition to the Borehole and Immobilization Alternatives. Decisions on the disposition of weapons-usable fissile materials will be based upon environmental analyses, technical and economic studies, national policy considerations, and public input.
